

CM2X512A-6400

The CM2X512A-6400 is a 512 MByte, single-rank DDR2 SDRAM DIMM designed for extreme speed. This part delivers outstanding performance in the latest generation of DDR2-based motherboards. It has been tested extensively in multiple DDR2 motherboards to ensure compatibility and performance at its rated speed. This memory has been verified to operate at 800MHz at 5-5-5-12 latencies. This module is also available in matched pairs of "Twin2X" modules tested as a set in a dual channel DDR2 motherboard.

FEATURES

- ▶ 512 Megabytes of memory in a 240-pin DDR2 DIMM
- ▶ Implemented using 64M x 8 DDR2 SDRAMs
- ▶ 100% tested at 800MHz in high performance DDR2 motherboards
- ▶ Legendary Corsair reliability and service
- ▶ Lifetime warranty

TEST SPECS

- ▶ Each module is tested in an Intel-based motherboard at 800MHz
- ▶ Tested at at the latencies of (5-5-5-12) at 2.1V
- ▶ SPD programmed at standard latencies of 5-5-5-12

The Fine Print: Every part is tested in Corsair's factory at 800MHz, but your actual results may vary depending on the overclocking margin of your CPU and motherboard. Newer motherboards may be used for production test as they become available. Corsair may periodically update the part with newer RAM revisions of same or greater performance. RAM used on the module may change without notice. © April 2005 Corsair Memory, Inc.
