

# TWIN2X1024-4300C3PRO

The TWIN2X1024-4300C3 is a pair of 512MByte, two-rank DDR2 SDRAM DIMMs designed for extreme speed. This part delivers outstanding performance in the latest generation of DDR2-based motherboards. It has been tested extensively as pairs in multiple DDR2 motherboards to ensure compatibility and performance at its rated speed. This memory has been verified to operate at 538MHz at the low latencies of 3-3-3-8. All XMS2 PRO Series modules include the platinum-colored high-efficiency aluminum XMS2 heatsink, and 24 activity LED's that show the level of memory activity on each bank. This part is also available in a single module.

## FEATURES

- ▶ 1024 Megabytes of memory in a 240-pin DDR2 DIMM
- ▶ Implemented using 32M x 8 DDR2 SDRAMs
- ▶ 100% tested at 538MHz in high performance DDR2 motherboards
- ▶ High-efficiency aluminium XMS2 heatsink
- ▶ 24 activity LED's showing memory activity on each bank
- ▶ Legendary Corsair reliability and service
- ▶ Lifetime warranty

## TEST SPECS

- ▶ Each module is tested in an Intel-based motherboard at 538MHz
- ▶ Tested at the low latency settings of 3-3-3-8 at 1.8V
- ▶ SPD programmed at the low latencies of 3-3-3-8

The Fine Print: Every part is tested in Corsair's factory at 538MHz, but your actual results may vary depending on the overclocking margin of your CPU and motherboard. Newer motherboards may be used for production test as they become available. Corsair may periodically update the part with newer RAM revisions of same or greater performance. RAM used on the module may change without notice. © September 2004 Corsair Memory, Inc.
