

# TWIN2X2048-6400PRO

The TWIN2X2048-6400PRO is a 2 GByte matched pair of DDR2 SDRAM DIMMs. This part delivers outstanding performance in the latest generation of DDR2-based motherboards. It has been tested extensively in multiple DDR2 motherboards to ensure compatibility and performance at its rated speed. This memory has been verified to operate at 800MHz at the low latencies of 5-5-5-12-2T. This module is also available in a single module part.

## FEATURES

- ▶ 2048 Megabytes of memory in a pair of 240-pin DDR2 DIMMs
  - ➔ *Two matched CM2X1024-6400PRO modules*
- ▶ Features activity LEDs
- ▶ 100% tested at 800MHz in high performance DDR2 motherboards
- ▶ Legendary Corsair reliability and service
- ▶ Lifetime warranty

## TEST SPECS

- ▶ Each module pair is tested together in an Intel-based motherboard at 800MHz
- ▶ Tested and packaged in pairs
  - ➔ *Packaged together immediately following system test*
- ▶ Tested at 5-5-5-12-2T latency settings at 1.9V
- ▶ SPD programmed at 5-5-5-12-2T values
- ▶ Implemented using 64M x 8 DDR2 SDRAMs

The Fine Print: Every part is tested in Corsair's factory at 800MHz, but your actual results may vary depending on the overclocking margin of your CPU and motherboard. Newer motherboards may be used for production test as they become available. Corsair may periodically update the part with newer RAM revisions of same or greater performance. RAM used on the module may change without notice. © August 2005 Corsair Memory, Inc.
