

TWINX1024-4400C25

The TWINX1024-4400C25 is a pair of 512 MByte DDR SDRAM DIMMs designed for extreme speed. TWINX matched memory pairs are specifically designed for motherboards using chipsets with dual memory channels. This part delivers outstanding performance at high clock speeds. It has been tested extensively in a variety of motherboards commonly used in gaming rigs. This memory has been verified to operate at 275 MHz at aggressive latencies of 2.5-4-4-8. This module is also available as a single module.

FEATURES

- ▶ 1024 Megabytes of memory
 - ➔ *Two matched CMX512-4400C25 modules*
- ▶ Dual channel testing environment
 - ➔ *275MHz Canterwood based test setup*
- ▶ Tested and packaged in pairs
 - ➔ *Packaged together immediately following system test*
- ▶ Benchmarked using both Athlon and Pentium test platforms
- ▶ Integrated aluminum heat spreader for improved thermal performance
- ▶ Lifetime warranty

TEST SPECIFICATIONS

- ▶ Tested at aggressive latency settings of 2.5-4-4-8 on both Intel and AMD platforms
 - ➔ *Test voltage: 2.75V*
